Experience

Harvard Business School **Boston, MA**
Product Manager, Student Association (Co-Op) *July 2024 – December 2024*
- Generated $200K in revenue within 4 months (meeting annual goal early) by streamlining inventory and fulfillment using Excel and Squarespace, developing custom product pages, and leveraging web tools; achieved over 30% profit margins to fund subsidized events and managed highest revenue in history of the products office.
- Launched and marketed compliant HBS-branded merchandise, resulting in 15% cost savings by negotiating with vendors and aligning with brand standards; achieved cross-functional success by managing stakeholders across Harvard licensing, legal, accounting, and external partners.
- Reduced employee training time by 50% by documenting 27 unique SOPs across marketing, merchandise, and operations workflows, enabling seamless co-op onboarding and long-term scalability.
- Increased attendance by 25% for 2,000-person events like the 2024 Harvard-Yale Tailgate by developing cohesive branding and theme-driven campaigns; reduced delivery delays by 40% by personally coordinating product fulfillment to ensure high-touch customer service.

Habits Inc. **Indianapolis, IN**
Product Manager (Intern) *February 2024 – June 2024*
- Decreased project delivery time by 30% by utilizing Jira within a Scrum framework to track and manage the integration of Plaid's KYC and Transactions API, ensuring project milestones were efficiently met and aligned with agile methodologies.
- Improved sprint planning efficiency by 40% by leveraging preexisting Figma files to analyze onboarding and financial information flows, enabling the creation of detailed epics and tasks in Jira for streamlined project management.
- Enhanced app reliability by 93% through comprehensive bug testing on iOS and Android applications, identifying and resolving critical issues which led to successful and timely patches with minimal user-reported problems.
- Reduced cloud infrastructure costs by 25% while assisting in transitioning the app from Azure to AWS, ensuring app parity and improving infrastructure efficiency with zero downtime.
