Python | TypeScript | JavaScript | Java | SQL | HTML/CSS

Frameworks & Libraries:

React | Node.js | Express | Flask | Jest | Cypress

Developer Tools:

Docker | Git | MongoDB | Databricks

Product & Design Tools:

Jira | Confluence | Figma | SharePoint | Excel

EXPERIENCE

State Street

January 2026 – June 2026

Product Manager, Global Technology Services (Co-Op)

Boston, MA

- Identified self-service gaps across 3 user groups and 16 portfolios adopting an internal analytics platform; authored role-based guides in SharePoint covering permission-based access, tooling, and data quality, lifting user sentiment ~40% and adoption ~15%
- Consolidated fragmented issue tracking into a unified SharePoint feedback pipeline covering 500+ items across demo calls, Teams messages, and email threads; structured taxonomy across 10 domains and 3 fix types to enable direct Jira story creation and analyst assignment
- Reduced inbound support load by driving self-service adoption via weekly Viva Engage FAQ spotlights, monthly office hours, and role-based guides across 3 SharePoint hubs

Harvard Business School

July 2024 – December 2024

Product Manager, Student Association (Co-Op)

Boston, MA

- Managed 50+ SKUs across Squarespace and physical storefronts, coordinating checkout flows and fulfillment operations for a \$200K+ annual revenue line
- Negotiated vendor contracts for 13 student orgs by leveraging demand volume; standardized the merchandise pipeline with shared templates and order-tracking sheets, cutting per-unit costs and saving ~\$30K/year
- Redesigned 15+ SOPs spanning product ordering to student org collaborations, resolving conflicting timelines and outdated product references; cut onboarding time and standardized handoffs across cycles

PROJECTS

Vantage | *TypeScript, Next.js, OpenAI API, Minimax M2.5, MapTiler API, WebGL*

February 2026

- Led a 5-person team at the AINU Hackathon to build a geopolitical catastrophe modeling tool in 48 hours; contributed across architecture, pipeline code, and the final pitch; placed 2nd
- Designed a multi-agent pipeline routing simulations through 5 domain-specific agents (economic, military, climate, infrastructure, political); synthesized outputs into a risk layer rendered on an interactive map

BallWatch | *Python, Flask, MySQL, Docker, Streamlit, Plotly*

October 2025

- Drafted 24 user stories across 4 personas to scope an NBA analytics platform; designed a normalized 15-table MySQL schema to enforce referential integrity
- Built an interactive Streamlit dashboard with Plotly visualizations surfacing scouting, lineup, and monitoring insights; integrated with a RESTful Flask API containerized via Docker Compose

LEADERSHIP

Kaleidoscope | *Khoury College Student Organization Coalition*

September 2023 – December 2025

Head of Community

Boston, MA

- Organized formal semester showcases and recurring community events to drive engagement and cross-org collaboration across Khoury student organizations
- Built a shared documentation hub with templates, tooling guides, and succession-planning resources for 35+ Khoury student orgs, reducing duplicated operational effort and ensuring continuity across leadership transitions
